I'm a dedicated professional with an agile mindset and a genuine passion for creating excellent products. In my Software Engineering career, I've had the pleasure of working closely with stakeholders to refine requirements and execute project plans, always emphasizing teamwork and adaptable problem-solving. My proudest professional achievement yet was being part of developing a new mobile application, which was built and launched within six months. The experience equipped me with knowledge of managing project timelines and prioritization.

Currently, I'm pursuing a master's degree in IT Project Management, with one year left in the program. The part-time and flexible schedule allows me to combine my studies with a full-time job, giving me the perfect balance to continue growing professionally. I'm excited about the prospect of bringing my strengths and enthusiasm to your team and contributing to your success.

EDUCATION

Stockholm university, Stockholm – MSc in IT Project Management

August 2023 - June 2025 (anticipated)

KTH, Stockholm – BSc in Information and Communication Technology

August 2017 - June 2021

WORK EXPERIENCE

EF Education First, Zürich – Junior Software Engineer

May 2021 - October 2022

Developed and launched a new app (300k+ users) using Flutter and .NET. Maintained legacy websites written in .NET and React. Part of an agile team where I was involved in planning the roadmap and refining requirements. Left due to relocation.

Cyclops Labs GmbH, Winterthur – Software Engineer Intern

July 2020 - January 2021

Used React.js to develop a multi-role supporting user interface, communicating with the RESTful underlying Cyclops interface and interacting with the Keycloak for authentication and authorization. Six-month-long internship.

THS Future, Stockholm – Event Manager

August 2018 - May 2019

Connected companies and students at KTH through campus events to help students make valuable connections to build their future careers.

KTH, Stockholm – Student Ambassador

October 2018 - June 2019

Inform and inspire presumptive students to apply for a program at KTH through presentations, campus tours and Q&A, including public presentation coaching sessions.
